

## ABSTRACT

A method for using the Internet includes the steps of entering character data indicating an operation desired by a user using a telephone and sending the character data to a provider's server; receiving the character data, using the provider's server, carrying out the operation desired by the user based on the character data, generating display data showing the result of the operation, and sending the display data to a broadcasting station; receiving the display data, using the broadcasting station, and radio-transmitting the display data; and radio-receiving the display data from the broadcasting station, using a television set, and showing the result of the operation on the screen of the television set, based on the display data.
